CONNECTIVITY

In today's world being connected is imperative, whether that's in the office, in the home or anywhere in the world, users of IT systems demand the ability to connect wherever they are. Claritas has worked with businesses to connect their users to systems for over 15 years, from dial up connections to global MPLS networks. Claritas has an independent view of network carriers, understanding that no longer does one size fit all. Working with Claritas enables clients to choose a multitude of network carriers that meet the specific requirements of the business, whether that is just straight internet access or international MPLS connectivity.

We recognise the importance of being the interface when you conduct business. If there is a problem you have the facility to speak to a network specialist who has the same passion as you do to resolve issues in the timeliest manner.

Products:

- MPLS
- VPLS
- Internet Connectivity
- Dedicated Fibre

Services:

- Network Management
