WEST YORKSHIRE
POLICE

CLARITAS 
SOLUTIONS

Hosting has evolved, no longer can organisations ignore the need to utilise external datacentre facilities, however the language isn't so straight forward. The words cloud, SaaS and web based services are being over utilised and often there is not a clear representation of what you are actually buying. Claritas have been supplying and supporting hosted environments since our inception and when we discuss hosting the language is clear.

Claritas working with West Yorkshire Police can provide a datacentre whereby your data is secure, and the infrastructure around it has been handcrafted to your exact requirements whether that be virtual, physical or a hybrid of the two. Claritas has the ability to provide you with a custom solution, from simply housing your equipment in an IL4 datacentre to providing fully managed application environments.
