

THE BENEFITS

WEST YORKSHIRE
POLICE

CLARITAS
SOLUTIONS

What are the benefits of Public Sector organisations using the facility?

There are a number of benefits to Public Sector organisations utilising the facility, the first of which is enabling seamless integration of data between public services. The datacentre has a fully diverse connection to the Public Services Network. This coupled with the ability to talk locally between other public bodies within the centre is provided in a secure and integrated way.

Secondly the unique collaboration between West Yorkshire Police and Claritas Solutions is enabling public expenditure to be reinvested into public services. There is a drive for government organisations to consolidate resources to reduce the public facilities overhead, and this facility represents an opportunity for public bodies to embrace this.

Further to this you are safe in the knowledge that the facility is publicly funded and does not require the need of Private Sector investment to ensure the continued operation of the datacentre, in an age where Private Sector companies are leveraged in debt against the return of their datacentre, this facility is operated and owned by the public sector, in addition Claritas Solutions are a privately held organisation, free of any debt and bank borrowing, ensuring that access to your mission critical sensitive applications will never be compromised.

As a Private Sector company what are the benefits?

There are a multitude of benefits to a private sector company using the datacentre, the centre conforms to the highest levels of security as you would expect with most datacentres. All of the staff in the datacentre work to ISO27001 and are SC and NPP v3 cleared, effectively the datacentre is of List-X status.

If you are a private sector organisation interacting with the public sector you are able to offer your clients and prospects the peace of mind that their data will be hosted in an IL4 datacentre, which is backed by the UK Government.

Other benefits...

This unique collaboration enables both the Public and Private Sector to invest into organisations that committed to future investment into the UK economy, whether that be re-investment into public services or investment into the UK technology sector growth, ultimately all investment into this is for the good of UK economy.

In summary...

- A Tier 3+ datacentre to IL4 security
- Publicly backed
- PSN connectivity
- Complete end to end service available
- Returning investment into the UK economy
