THE DATACENTRE

The facility is in excess of 30,000 sq. ft. of prime datacentre and support areas, access to the facility is paramount and is situated just 2 miles from the M1 motorway and 10 miles from Leeds city centre. The facility is built and fitted to the highest standards and will include,

- Diverse routing of power supplies to all critical plant and equipment
- Standby diesel power generation and parallel UPS system
- Argonite gas and high pressure water mist fire suppression systems
- Dual skinned high security fencing
- Motion sensor CCTV
- Rain water harvesting

The main data hall is capable of housing in excess of 400 20Amp racks, with the ability to house a further 150 at a separate site. The main data hall can be divided into discreet sections enabling complete segregation from any other tenant.

What Security will be in place?

The datacentres will be operated by West Yorkshire Police; therefore the physical security is of the highest levels. Inside the datacentre all staff will be SC and also to NPP v3 as a bare minimum, the datacentre confirms to IL4 level of security. The datacentre is also able to fully operate for 7 days with no outside world intervention; this includes refuelling of generators which are refuelled from the perimeter of the centre.

What makes the datacentre any different from any commercial datacentre offering?

The unique proposition delivers benefits to both the Public and Private Sectors; the datacentre is on the Public Services Network (PSN) enabling seamless integration with any other PSN site. The datacentre also conforms to IL4 classification, ensuring that sensitive data is correctly handled. All staff using the datacentre are as a minimum SC cleared and are NPP v3 accredited.
